

Science GSEs: 1st Grade

Standard: S1E1

- "Obtain, evaluate, and communicate weather data to identify weather patterns"
- ID different types of precipitation
- Read and record data from simple weather instruments like thermometers and wind vanes to investigate current weather conditions
- Analyze and represent weather data using graphs/tables to characterize weather types and ID seasonal weather patterns

Water activity to fulfill standard: Have students match each precipitation type (rain, snow, sleet, or hail) with the state of the precipitation (solid or liquid). Later, allow students to match each precipitation type to spots on a weather map.
